ILLINOIS JOURNAL OF MATHEMATICS

Contents of Volume 45 (2001)

Scot Adams, Orbit nonproper dynamics on Lorentz manifolds 1191

Patrick Ahern, Željko Čučković, Products of Toeplitz operators on the Bergman space 113

Hilário Alencar, Manfredo do Carmo, Fernando Marques, Upper bounds for the first eigenvalue of the operator $\mathbf{L}_r$ and some applications ... 851

John M. Alongi, Accessibility and hyperbolicity 681

Masaaki Amou, Masanori Katsurada, Differential transcendence of a class of generalized Dirichlet series 939

Mitsunori Ara, Instability and nonexistence theorems for F-harmonic maps . 657

M. Argerami, D. Stojanoff, Orbits of conditional expectations 243

Richard M. Aron, Yun Sung Choi, Sung Guen Kim, Manuel Maestre, Local properties of polynomials on a Banach space 25

Michael Aschbacher, Ulrich Meierfrankenfeld, Bernd Stellmacher, Counting involutions 1051

Rauno Aulaskari, Peter Lappan, Ruhan Zhao, On harmonic normal and $\mathbf{Q}_p^{\#}$ functions 423

E. Ballico, Brill–Noether theory for general branched coverings of $\mathbf{P}^1$ 1247

M. Bekker, On the extension problem for continuous positive definite generalized Toeplitz kernels 1315

István Berkes, Walter Philipp, Robert Tichy, Pair correlations and U-statistics for independent and weakly dependent random variables 559

Bruce C. Berndt, Heng Huat Chan, Eisenstein series and approximations to π 75

Alexander Borichev, Mikhail Sodin, Krein's entire functions and the Bernstein approximation problem 167

A. A. Borisenko, On the global structure of Hopf hypersurfaces in a complex space form 265

Amie Bowles, Lukasz Fidkowski, Amy E. Marinello, Cesar E. Silva, Double ergodicity of nonsingular transformations and infinite measure-preserving staircase transformations 999

J. Brüdern, A. Kumchev, Diophantine approximation by cubes of primes and an almost prime. II 309

Manfredo do Carmo, Hilário Alencar, Fernando Marques, Upper bounds for the first eigenvalue of the operator $\mathbf{L_r}$ and some applications ... 851

Heng Huat Chan, Bruce C. Berndt, Eisenstein series and approximations to π ... 75

Zoé Chatzidakis, Generic automorphisms of separably closed fields ... 693

Yun Sung Choi, Richard M. Aron, Sung Guen Kim, Manuel Maestre, Local properties of polynomials on a Banach space ... 25

Ching Chou, Anthony To-Ming Lau, Vector-valued invariant means on spaces of bounded operators associated to a locally compact group ... 581

Željko Čučković, Patrick Ahern, Products of Toeplitz operators on the Bergman space ... 113

Marcos Dajczer, Luis A. Florit, A class of austere submanifolds ... 735

Jeffrey Diller, Green's functions, electric networks, and the geometry of hyperbolic Riemann surfaces ... 453

Yong Ding, Chin-Cheng Lin, A class of maximal operators with rough kernel on product spaces ... 545

Harold Donnelly, Quasiconformal harmonic maps into negatively curved manifolds ... 603

Allan Donsig, Alan Hopenwasser, David R. Pitts, Automatic closure of invariant linear manifolds for operator algebras ... 787

Randall Dougherty, Chris Miller, Definable boolean combinations of open sets are boolean combinations of open definable sets ... 1347

Jacek Dziubański, A spectral multiplier theorem for $\mathbf{H^1}$ spaces associated with Schrödinger operators with potentials satisfying a reverse Hölder inequality 1301

Ricardo Sa Earp, Eric Toubiana, On the geometry of constant mean curvature one surfaces in hyperbolic space ... 371

Maite Fernández-Unzueta, Dunford-Pettis and Dieudonné polynomials on Banach spaces ... 291

Lukasz Fidkowski, Amie Bowles, Amy E. Marinello, Cesar E. Silva, Double ergodicity of nonsingular transformations and infinite measure-preserving staircase transformations ... 999

Luis A. Florit, Marcos Dajczer, A class of austere submanifolds ... 735

F. Fontenele, Sérgio L. Silva, A tangency principle and applications ... 213

Petros Galanopoulos, Aristomenis G. Siskakis, Hausdorff matrices and composition operators ... 757

Anthony V. Geramita, Tadahito Harima, Yong Su Shin, An alternative to the Hilbert function for the ideal of a finite set of points in $\mathbb{P}^n$ 1

Nobuo Hara, Karen E. Smith, The strong test ideal 949

Tadahito Harima, Anthony V. Geramita, Yong Su Shin, An alternative to the Hilbert function for the ideal of a finite set of points in $\mathbb{P}^n$ 1

Stefan-M. Heinemann, Bernd O. Stratmann, Geometric exponents for hyperbolic Julia sets 775

William Heinzer, Christel Rotthaus, Sylvia Wiegand, Intermediate rings between a local domain and its completion, II 965

James L. Heitsch, Steven Hurder, Coarse cohomology for families 323

A. Alexandrou Himonas, Gerard Misiołek, A priori estimates for Schrödinger type multipliers 631

Lop-Hing Ho, Sharp subelliptic estimates for $n-1$ forms on finite type domains 1401

Joris van der Hoeven, Operators on generalized power series 1161

Alan Hopenwasser, Allan Donsig, David R. Pitts, Automatic closure of invariant linear manifolds for operator algebras 787

Steven Hurder, James L. Heitsch, Coarse cohomology for families 323

S. V. Ivanov, Recognizing the 3-sphere 1073

Wojciech Jaworski, Probability measures on almost connected amenable locally compact groups and some related ideals in group algebras 195

M. Jiménez-Sevilla, J. P. Moreno, A constant of porosity for convex bodies 1061

Mark R. Johnson, Equidimensional symmetric algebras and residual intersections 187

Aimee S. A. Johnson, Ayşe A. Şahin, Even Kakutani equivalence and the loose block independence property for positive entropy $\mathbb{Z}^d$ actions 495

William B. Johnson, Timur Oikhberg, Separable lifting property and extensions of local reflexivity 123

Russell Johnson, Sylvia Novo, Rafael Obaya, An ergodic and topological approach to disconjugate linear Hamiltonian systems 803

Masanori Katsurada, Masaaki Amou, Differential transcendence of a class of generalized Dirichlet series 939

Sung Guen Kim, Richard M. Aron, Yun Sung Choi, Manuel Maestre, Local properties of polynomials on a Banach space 25

Kang-Tae Kim, Steven G. Krantz, Complex scaling and domains with non-compact automorphism group 1273

Erich Peter Klement, Radko Mesiar, Endre Pap, Uniform approximation of associative copulas by strict and non-strict copulas 1393

Jan Krajíček, On the degree of ideal membership proofs from uniform families of polynomials over a finite field 41

Steven G. Krantz, Kang-Tae Kim, Complex scaling and domains with non-compact automorphism group 1273

A. Kumchev, J. Brüdern, Diophantine approximation by cubes of primes and an almost prime. II 309

S. Kupin, S. Treil, Linear resolvent growth of a weak contraction does not imply its similarity to a normal operator 229

Peter Lappan, Rauno Aulaskari, Ruhan Zhao, On harmonic normal and $\mathbf{Q}_p^{\#}$ functions 423

Anthony To-Ming Lau, Ching Chou, Vector-valued invariant means on spaces of bounded operators associated to a locally compact group 581

Min Ho Lee, Pseudodifferential operators associated to linear ordinary differential equations 1377

Mikyoung Lim, Symmetry of a boundary integral operator and a characterization of a ball 537

Chin-Cheng Lin, Yong Ding, A class of maximal operators with rough kernel on product spaces 545

Manuel Maestre, Richard M. Aron, Yun Sung Choi, Sung Guen Kim, Local properties of polynomials on a Banach space 25

Juan J. Manfredi, Enrique Villamor, Traces of monotone functions in weighted Sobolev spaces 403

Valery Marenich, Manifolds close to the round sphere 615

Amy E. Marinello, Amie Bowles, Lukasz Fidkowski, Cesar E. Silva, Double ergodicity of nonsingular transformations and infinite measure-preserving staircase transformations 999

Fernando Marques, Hilário Alencar, Manfredo do Carmo, Upper bounds for the first eigenvalue of the operator $\mathbf{L_r}$ and some applications ... 851

Alec L. Matheson, Aleksandrov operators as smoothing operators 981

Ulrich Meierfrankenfeld, Michael Aschbacher, Bernd Stellmacher, Counting involutions 1051

Radko Mesiar, Erich Peter Klement, Endre Pap, Uniform approximation of associative copulas by strict and non-strict copulas 1393

Chris Miller, Randall Dougherty, Definable boolean combinations of open sets are boolean combinations of open definable sets 1347

Gerard Misiołek, A. Alexandrou Himonas, A priori estimates for Schrödinger type multipliers 631

Xiaohuan Mo, Harmonic maps from Finsler manifolds 1331

John Atwell Moody, Divisibility of ideals and blowing up 163

John Douglas Moore, Jean-Marie Morvan, On isometric Lagrangian immersions 833

J. P. Moreno, M. Jiménez-Sevilla, A constant of porosity for convex bodies 1061

Jean-Marie Morvan, John Douglas Moore, On isometric Lagrangian immersions 833

K. Musial, L. Di Piazza, A characterization of variationally McShane integrable Banach-space valued functions 279

Sylvia Novo, Russell Johnson, Rafael Obaya, An ergodic and topological approach to disconjugate linear Hamiltonian systems 803

Rafael Obaya, Russell Johnson, Sylvia Novo, An ergodic and topological approach to disconjugate linear Hamiltonian systems 803

Timur Oikhberg, William B. Johnson, Separable lifting property and extensions of local reflexivity 123

Endre Pap, Erich Peter Klement, Radko Mesiar, Uniform approximation of associative copulas by strict and non-strict copulas 1393
